

ESG Scope 3 Emissions

Explaining the ESG scope levels

- Scope 1: Direct emissions from sources that are owned or controlled by the organization.
- Scope 2: Indirect emissions from the generation of purchased electricity, heating, and cooling consumed by the organization.
- Scope 3: Indirect emissions from activities that occur outside the organization's own operations but are related to the organization's activities. Scope 3 emissions include emissions from the entire value chain, such as those from the supply chain, transportation of goods, employee commuting, business travel, and waste disposal.

Supply Chain Emissions Assessment Process

Start your ESG journey with a free supply chain assessment to discover how to measure your spending and improve your supply chain emissions.

Standard Assessment Measure

- Provide industry recognized measurement of all modes of transportation of CO2 emissions.
- Measure individual carrier emissions performance.

Report

- Provide shipment-by-shipment data through in-house analysis tools and annual reporting.

Improve

Through an assessment of your supply chain, you can expect the:

- **Right Packaging** → Package cartonization
- **Right Carrier** → Carrier bid & selection with metrics per carrier
- **Right Plan** → Planning & optimization
- **Right Location** → Distribution network design

By moving to a pool distribution network, businesses could see an average savings of **5-20%**.

Advanced Assessment

- Multi-level supply chain mapping driven by artificial intelligence (AI)
